Pacific Center for Human Growth Technical Assistance Program

This letter is to notify BHCS staff and contractors that the Pacific Center will begin to provide technical assistance on serving LGBTQ community members who have behavioral health needs. This will be a continuation of the MHSA INNOVATIONS project by the Pacific Center where they created a “Welcoming toolkit” for mental health providers. Technical assistance will include how to create a welcoming environment for LGBTQ people and address some of the unique behavioral health challenges facing this community. In addition and as part of the service, the Pacific Center will offer regular free, drop in support group for LGBTQ individuals who are facing loss, grief or trauma.

To find out more about this service please contact the Pacific Center’s Executive Director, Leslie Ewing: lewing@pacificcenter.org.

Sincerely,

James Wagner LMFT
Adult System of Care Director for Alameda County BHCS
