

Frequently Asked Question #5 : For providers that are operating under both interim/extension and new DMC-ODS contracts, how do we enter and bill for group counseling services?

ANSWER:

- *For the new RUs*, in InSyst please include all documentation time in the total duration of service. The documentation will not appear on the PSP131 as separate time.
- *For old RUs*, enter the total of service + doc time for each group service provided on the client account. Calculate the monthly invoice based on the 131 report for the old RU and based on the old RU invoicing rules. You will be reimbursed according to group flat rate as normal, however you may be reimbursed for extra documentation at cost settlement if it is within the limit of your program allocation. Unless total time is entered in InSyst BHCS will not be able to calculate any future cost report settlement.
